MILLION
MILK JUGS RECYCLED SINCE 2005

APPRECIATE THE OUTDOORS.

lollygagger

The Lollygagger Collection is our first family of outdoor furniture specifically meant to hang out together. Designed to be fun, lighthearted and low to the ground, this collection is for people who take their active lives seriously but cherish that hard-sought lounging time.

THE LOLL STORY

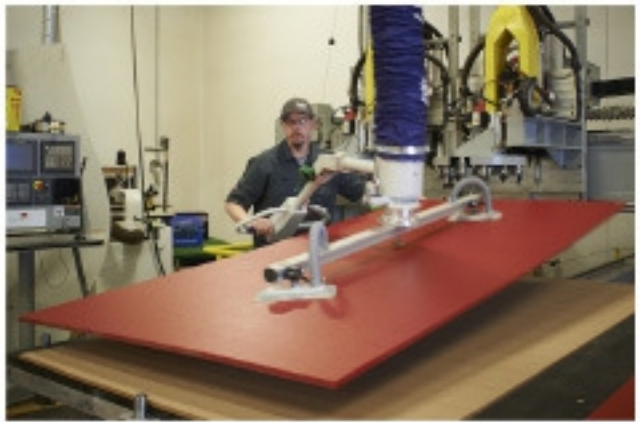

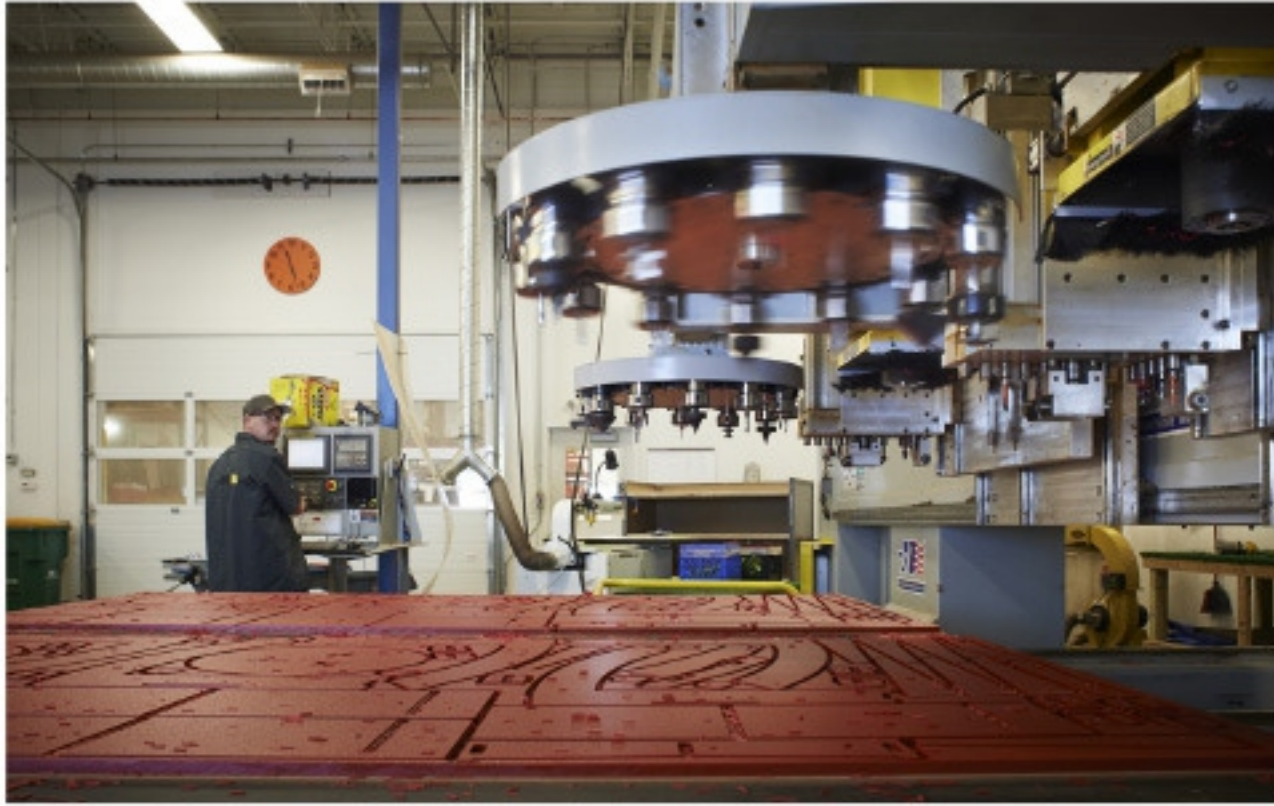

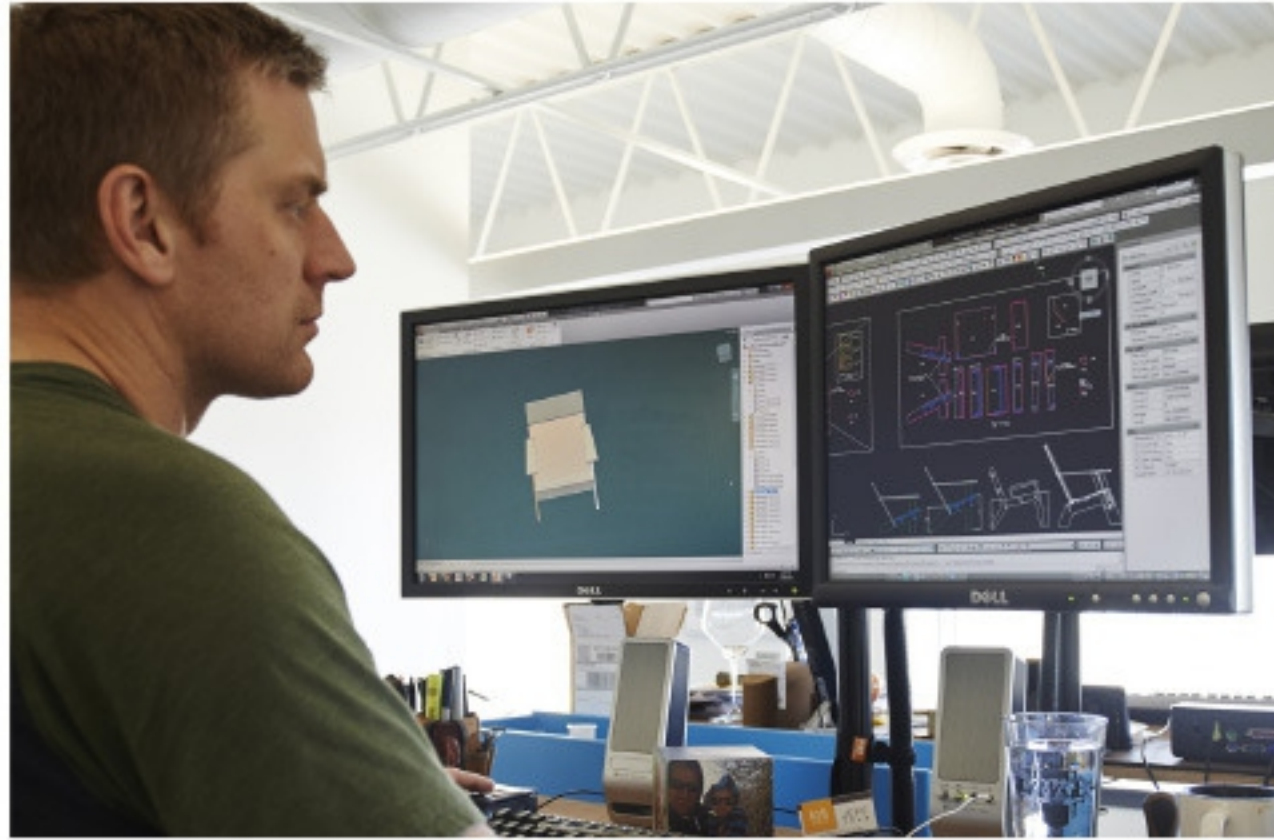

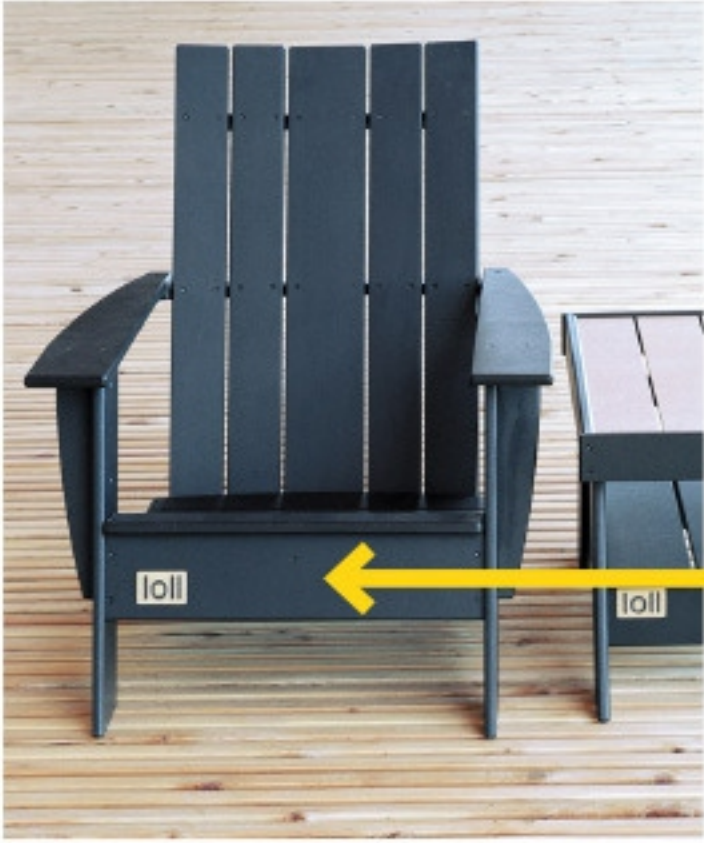

At Loll Designs we manufacture original premium products crafted by 45 genuine humans. Our innovative and award winning furniture is designed for comfort and longevity and made with 100% recycled plastic and locally sourced components. Quality is built into every product including material choices, design, manufacture, an authentic warranty, and unparalleled customer service.

When Loll first started prototyping an outdoor chair in 2003, her parent company was municipal skate park manufacturer TrueRide. When a skate park was produced there was always leftover material that was too small to be used for the large public use skate ramps. Original Loll chairs were produced from these scraps of 5/8-inch thick high-density polyethylene. This thick HDPE sheet is made entirely with reclaimed milk jugs and is ideally suited for skate ramps and as it turns out, outdoor furniture too. After nearly 500 skate park projects TrueRide was sold in 2007. The Loll brand continued to build on this durable skate-proof material that was proven to required no maintenance and would hold up in all weather conditions.

Loll has forged ahead creating a new category in outdoor living and a unique place in the industry with recognition as the creator of the first mass-produced modern Adirondack chair. With more than 200 different products in our collection, Loll furniture is sought internationally for high-end residential and commercial projects that specify original design. Hand sketching of product concepts initiates state of the art manufacturing. 3D design translates furniture parts to be cut on computerized CNC routers with precise tolerances. All handwork is completed by skilled furniture craftspeople. An innovative fastening system has removed fasteners from visible surfaces and permits flat pack shipping, simple assembly, and if needed, replacement parts. Loll is recognized for sustainable business practices and a continuous focus on reducing the company's environmental footprint. Reclaiming manufacturing heat, a zero waste initiative, an early member of One Percent for the Planet, and our annual community creek clean up and tree planting are just some of Loll's eco initiatives.

At Loll, we truly are greater than the sum of our parts and all coalesce to make innovative and functional products that are beautifully crafted in the USA and distributed worldwide. Our vision: "Loll Designs inspires people to appreciate the outdoors." Loll is furniture for the modern lollygagger.

Loll is based in Duluth, Minnesota, USA, Earth.
